

Quality You Can Count On

CJ Electrical invests in understanding their client's needs including the electrical wiring layout, equipment and the control systems that drive their plant and equipment.

Where possible, the company maintains these details in their operating system to assist with future service, adding to long term savings. Clients are supplied with fixed price, detailed, and itemized quotations for project works.

CJ Electrical ensures that clients are serviced by the most appropriate trades professionals for the specific task. Special client requirements are recorded in our system database and our tradesmen are fully briefed before going on site.

The company maintains a training program that ensures technical ability, statutory compliance and the ability to converse with client's personnel. Safety is uppermost in the CJ Electrical "List of priorities." Tradesmen and vehicles are equipped appropriately and are instructed to comply with client's and their own safety policies.

CJ Electrical Pty Ltd carries out all work in accordance with current best practice methods. Fully documented test results are collated as part of commissioning and made available to clients at hand over. Compliance regulations are adhered to and certificates issued upon completion of work.

Electrical professionalism

CJ Electrical is a well-known and respected name in quality electrical installations and communication services. The company has continuously operated since 1976. In that time, CJ Electrical's list of satisfied clients is impressive and includes construction and manufacturing industries, commercial operators, educational establishments and many more.

The company's aim is to provide a consistently high level of customer service. From small simple upgrades and repairs to major commercial and industrial Installation projects.

CJ Electrical prides itself on being reliable and responsive to customer's needs including:

- ◆ design layouts for switchboards, cable runs and outlets
- ◆ planned maintenance schedules for heavily used / critical plant and equipment
- ◆ install and "program" logic controllers, relay circuits plus repairs and upgrades
- ◆ test and tag RCDs/Cords to OHW&S statutory requirements, including registers
- ◆ safety and power saving consultation.

A futureproofed voice and data system

CJ Electrical, incorporating Datalink Applications can provide you with a cabling system to meet your voice and data communications systems requirements for years to come. The company can effectively service clients from small business installations through to large corporate networks, backed by written warranties for peace of mind.

CJ Electrical can provide you with a versatile solution for your office communications structure, including wireless technology to provide freedom of mobility from anywhere in the office, including messaging. Data technicians are also mainly "A" Class electricians and can provide power solutions while on site.

The data offer consists of:

- ◆ design, installation, and maintenance of voice/data networks
- ◆ a full range of copper, Cat 5e, Cat 6 and fibre optic together with patch panel solutions
- ◆ supply fixed price, detailed and itemized quotes
- ◆ full test and documentation provided for compliance and warranty
- ◆ digital phone systems including computer telephony integration.

Security and automation using C-Bus systems

CJ Electrical's automation specialists will help you make a smart decision. Save energy – save money. Every business must consider ways to keep their energy use for power and lighting to an absolute minimum. The best way of achieving this is through a building automation system, such as C-Bus used in conjunction with motion sensors and timers to provide optimum lighting while minimising energy consumption and maximize dollar savings.

In addition, other functions such as air-conditioning, irrigation and security can be integrated with the program to provide a genuine building monitoring and management system.

CJ Electrical's team of integrators can custom design a building management solution that's perfect for you. The company can also take care of your security needs providing you with state of the art alarm systems, smoke detectors, surge arrestors and power protection circuitry. Automation solutions comprise:

- ◆ lighting control
- ◆ heating & cooling
- ◆ security installation
- ◆ surge and power protection.

Ongoing service - it's a vital part of the solutions package

Downtime is a dirty word in business and the last thing your office or factory needs is lost time or production due to a faulty power, lighting or data infrastructure.

CJ Electrical can maintain your infrastructure for the life of the premises to significantly reduce potential problems. Should you encounter a problem with any of your infrastructure, CJ Electrical's emergency call out service will get you started again. The service and maintenance package includes:

- ◆ installation and repair of lighting, and lighting circuits
- ◆ installation and maintenance of security, safety equipment and exit lighting
- ◆ logbook maintenance provided
- ◆ maintenance and repair of all types of electrical equipment
- ◆ emergency call out service - 2 hours or less
- ◆ extra phone or data points installations or maintenance
- ◆ premises upgrades and refits of electrical phone and data infrastructure.
